

We know you're busy. That's why Palmetto Health-USC Medical Group's physician practices are offering a way for you to manage your health care online.

We offer convenient and easy-to-use patient portals that allow you to:

- Communicate with your doctor's office
- Refill prescriptions
- Review your lab results
- View your personal health information

Our portals are encrypted and password-protected, too, so health data remains secure.

Please note that separate invitations are required for each portal and they may be accessed at <https://phuscmg.org/patient-portals>.
